

Fence Regulations

Fences can be constructed on property lines. The Homeowner is responsible for establishing property lines. A survey should be obtained with the property corners located.

The maximum height of a fence is six (6') feet tall – rear and side yard, behind required building line.

Permit and inspection are required – post holes must be a minimum depth of 36" inches

No fencing is allowed in the front yard. If on a corner lot, two fronts exist. (see example below)

BEFORE YOU DIG: Contact IUPPS at 1-800-382-5544 or 811 for underground utility locates.
